PROFILE

Undergraduate, in the field of Software Engineering, with sound knowledge and expertise in programing skills (Machine learning, Frontend development, backend development, database management), and up to date with innovative technologies. Strong desire and profound ability in quick-grasping, and independently working in an efficient manner with minimal supervision.

VISION

To be part of an esteemed organization, a truly Global player in the Industry of Information Technology that offers equal opportunities and progressive career development, willing to lend a hand to an Apprentice (currently at an Internship level), to make inroads into a lasting career.
